- › Battery change does not require removal of sight from slide keeps the sight zeroed at all times

MEPRO MicroRDS

Red Dot Micro Sight with Quick Release and Backup Night Sights
For Handguns, Rifles and Shotguns

OPTICS

MEPRO MicroRDS, the latest addition to the MEPRO RDS and RDS PRO family, is a small, rugged, and energy-efficient electro-optical red dot sight, designed for both handguns and rifles.

The MEPRO MicroRDS serves as the main aiming sight for handguns or as a backup sight for rifles, offering fast target acquisition at close distances.

The MEPRO MicroRDS with its large display window and clearly defined red-dot ensures rapid target acquisition with both eyes open.

The MicroRDS Quick Release Adaptor is designed to fit a great variety of handguns thanks to its patented, quick release mounting system. The backup TRU-DOT™ Night Sight has an integral rail for easy attachment.
