

THERMAL

MEPRO NOA Family

Uncooled Thermal Weapon Sights

The NOA Family of Uncooled Thermal Weapon sights, provides numerous aiming solutions with high performance observation at close and medium ranges for sharpshooters, as well as long ranges for snipers.

The NOA sights are specially designed to work under harsh environmental conditions and to comply with the massive weapon recoils of different calibers (from 5.56mm to 0.5"). The sights allow efficient day & night operations under low-light conditions, dust & smoke scenarios, along with complete darkness common in CQB.

MEPRO NOA Family

Uncooled Thermal Weapon Sights
