- › Compatible with all MIL-STD-1913 Picatinny rails
- › 12 years warranty for Night Sight luminance

MEPRO FRBS

Folding back-up sight set with self-illuminated night sights

The FRBS are tritium-enhanced, self-illuminated front and rear back-up sights designed to provide the shooter secondary sights in case the primary optics go down.

FRBS sights are advanced, low-profile, durable, tritium-enhanced auxiliary front and rear back-up sights.

The sights quickly fold up or down depending on the shooters needs. Sight pin elevation is easily and quickly adjusted without tools. FRBS sights are readily mounted on any 1913 Picatinny rail. Day or night, the tritium makes the FRBS a viable option.

FRBS M4D - Front and Rear Set of Flip-up Sights with Tritium - **4 Rear Dots**

FRBS M2D - Front and Rear Set of Flip-up Sights with Tritium - **2 Rear Dots**
