-  Sight Roll Indicator
-  Bluetooth Connection

DOUBLE SHOOT®

The MEPRO FORESIGHT™ offers features and benefits to shooters across a wide range of disciplines —Law Enforcement, Competitive, Professional, and Hunters—who want to upgrade their capabilities. The MEPRO FORESIGHT™ is the first augmented red dot sight with additional built in features which can be accessed without using bluetooth connectivity—projecting real-time data, to user's FOV (Field of View).

As a top-grade stand-alone optic, the MEPRO FORESIGHT™ is powered by a rechargeable battery using the commonly utilized USB-C cable. Features include an internal compass, battery level indicator, numerous pre-set tactical reticles (which can be changed/programed according to the user's preferences), integrated light sensor which automatically determines reticle brightness. The FORESIGHT™ is unique in that its Bluetooth connectivity allows the shooter to select from the database of reticles and to update the sight when new features are available.

The MEPRO FORESIGHT™, the first of its kind, provides greater technical advantages by allowing the user to utilize the Double Shoot® app which provides benefits not seen before on an optic. Automatic Digital Zeroing without touching the optic by shooting a multi-shot group and uploading a photo of the grouping to the app. The system analyzes your mean point of impact and zeroes the weapon automatically. Real time projected data provides the shooter with critical data needed to assist in accurate shot placement, while using a wide crisp viewing window.

Mobile APP advantages:

- > Store up to 10 firearm profiles including ballistic data and zero settings
- > Upload previous stored profiles from your mobile App to the sight
- > Rich selection of reticles for all tactical scenarios
- > Frequent firmware updates and features
- > Automatic Digital Zeroing using Double Shoot® App

First of its kind, innovative red-dot sight with overlay digital display
