

MEPRO microRDS

Red Dot micro Sight with Quick Detach (QD) Adaptor and Backup Day/ Night Sights

Dovetail QD Mount Kit

for Classic pistols
(Kit incl. backup sights)

Optics-Ready QD Mount Kit

for Optics-Ready pistols

Optics Only Kit

with Picatinny adaptor

The MEPRO MicroRDS Kit is the perfect solution to attach Red Dot sights to Optics Ready pistols — providing excellent backup sights solution — without milling or drilling the pistols' slide. Technological advances in design and manufacturing allows the patented quick detach (QD) Kit to utilize the existing rear dovetail slot to mount the adaptor which holds the MEPRO microRDS. Existing brand red-dot optics can be mounted on the adaptor as well. It is the only mounting solution to have quick mount and dismount without having to re-zero the pistol. Now every pistol is Optics Ready without having to drill and tap the slide or barrel. The adaptor mounts directly to a MEPRO Tru-Dot™, self-illuminated sight which also functions as a back-up sight should the shooter want to remove the red dot optic. It can be placed back on the gun without having to re-zero the sight.

The MEPRO MicroRDS will fit Optics Ready pistols, utilizing a special adapter plate which allows you to mount the sight with the QD adaptor. It is also available with a standard Picatinny adapter, to connect the sight to rifles and shotguns, as a primary or back-up sight.

Accessories:

Picatinny to QD Adaptor

Rapidly switch your red-dot from your pistol to your conversion kit - on any other standard picatinny rail

The small, durable, and lightweight pistol optic features a 3.0 MOA red dot which ensures quick target acquisition. The energy-efficient sight is powered by a single CR2032 battery which can be changed without removing the sight from the gun. The large sight window provides greater FOV with both eyes open in any lighting condition—day, low-light or nighttime. MEPROLIGHT'S mounting solutions allow you to simply attach the MEPRO microRDS to almost any model pistol, without needing to re-zero when removing and putting back into the

Proven advantages:

- > One sight fits all handgun platforms —Optics-Ready and Non-Optics ready — classic pistols, rifles and shotguns
- > No need to drill and tap the slide
- > Patented, quick detach mount
- > Conversion kit allows the sight to be put on and taken off as desired
- > MEPRO Tru-Dot® back up Day / Night sights are included in the Kit
- > Battery change does not require removal of sight from pistol. Remains zeroed at all times
- > No need for tall co-witness sights
