

# MEPRO EVERGREEN™

## Super Bright LED Illuminated Sight for Daytime and Nighttime Operation

LED

Energy Efficient

Brightest Dots

24 Hours

Patent Pending

**Mepro Evergreen™** is a super bright LED based illuminated sight for daytime and nighttime operations. The Mepro Evergreen™ enables the shooter to hit stationary or moving targets while increasing dramatically the hit probability.

In daytime and nighttime operations, the shooter's target acquisition capability deepens on a clear view of crystal clear solid dots. The super bright LED light source inserted into both front and rear metal housing, ensure a clear sharp illuminated three dot picture.

Based on an illuminated sight patent, The Mepro Evergreen™ has an exceptional power source which ensures constant and reliable use of 5 consecutive years of operation.

Meprolight® also offers for selective pistol models the Mepro Evergreen™ super bright LED front sight only with U shape or square notch rear sight (not illuminated). Both options have shown a dramatic increase in users hit probability.

The Mepro Evergreen™ does not contain any hazardous material and complies with European standards.

Meprolight®'s modern design, production and test facilities, with the most experienced technical staff in the industry are ready to support you. When quality counts, be sure with Meprolight®.

### Proven advantages:

- > Super Bright LED light source
- > 5 continuous years of operation
